

When your business success depends on it,
Risk Management becomes a Leadership responsibility

CRP Technologies is one of India's leading risk mitigation and consulting solution providers. We focus on providing customized solutions that maximize profitability, while optimizing business processes. Our strength lies in the vast domain of knowledge we have accumulated over our decade-long experience in applying best-in-class risk management solutions.

Today's volatile economic conditions, rapidly evolving market drivers and increasingly complex regulatory mandates are resulting in a growing demand for a holistic and integrated approach to risk management. With a multitude of risks facing organizations - Strategic, Financial, Operational, People and Brand - organizations need to build an enabling risk management framework, and move towards institutionalizing risk management.

Whether your most critical pain point involves transforming risk mitigation from a reactive action to a core function in decision-making, or risk strategy formulation or improving operational efficiency, CRP continues to help.

At CRP, we know exactly what commitment to customers means and what it means to take responsibility for their business.

Service Offerings

CRP's integrated risk management portfolio is designed to help organizations of all sizes and complexities to achieve tactical and strategic goals. Each service is based on CRP's risk management framework and industry best practices. CRP recognizes that each company is unique, and hence, each service is tailored to address distinct business objectives. While each service may be delivered as a standalone initiative, combined activities provide improved risk integration, coordination, and optimization.

Robust Processes and Technology

CRP is an ISO 9001:2000 certified organization with standard processes across product lines and locations. We have a rigorous process of internal audit and use an automated workflow system across all our processes and products. We deploy a customized proprietary system to incorporate operational and enterprise risk management frameworks.

At the heart of CRP's services lies innovation. We harness our skills, proprietary tools and technology to develop innovative solutions to meet unique client needs.

Wide Network and Resources

CRP Technologies has a dedicated team of over 600 professionals consisting of an eclectic mix of managerial professionals, domain experts and people with hands-on field experience. Our unique pan-India branch network spread over 95 locations and presence in the Middle East allows us to implement solutions on the ground for our clients.

We are known and respected for creating customer-centric programs. More so, for being able to successfully transform risk from a non-measurable and unpredictable uncertainty to a definite and scientific opportunity.

CEO's Message

CRP Technologies contributes significantly to the Risk Mitigation strategy of its clients, and while doing so, provides an unrivalled service experience. Through the execution of customized and high-quality risk based solutions, alongside using cutting edge technology and knowledge co-creation for its clients, we strive to further enhance our client-focused solutions and services. Our commitment to offering high-quality and international standards of risk mitigation solutions and consulting services continues to drive our business direction.
